CELEBRITY RED CARPET

ROSARIO DAWSON'S SHAVED HALF HAWK HAIRSTYLE LOOKS GREAT WITH METALLICS, COPY HER LOOK!

Rosario Dawson's half hawk hairstyle is so cool we're almost considering getting one ourselves. Until we decide whether or not to finally take the plunge and actually shave half of our hair off, we'll stick to stealing the rest of her look.

Take this recent ensemble for example. At a restaurant opening in New York, the actress was spotted wearing a chic blue dress with metallic accessories that, somehow, made her haircut seem even more impressive.

DIY

To get a "Rosario-inspired" look, why not add some metallics into your own look? If you have some, slip your feet into a pair of metallic shoes and go wild with contrasting metallic jewellery.

If you don't own many metallic items outside of your cutlery drawer, however, fear not!

That's where makeup comes in handy...

Cheat your way to metallic victory with a gold or silver manicure, that way your own hands become an accessory!

Metallic eyeshadow is another great little trick to try when lacking in bling. Subtle amounts of silver, gold or even colorful metallic eyeshadows help add extra sparkle to your look whilst simultaneously drawing attention to your eyes AKA your God-given jewels.

And that's how you fake-copy a metallic look! You can also get a faux half-hawk if you *really* want to look like Rosario with no strings attached...
